

Cloud Data Lake Accelerator

Kickstart business success with the power of data

Building a Data Lake is usually a complex task, that can take up to months, consuming cost and resources. It involves moving data from various sources, setting up storage and data indexing, enabling access and analysis, and more. With our AWS and Big Data expertise, we can cut down the complexity and help deploy your Data Lake within 6 weeks at much lower costs. **Conditions Apply**

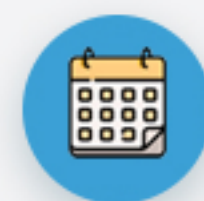

Starting USD 12000

2 Data Sources

4 Dashboards/Reports

10 Weeks

We offer a set of functionalities and features that will put you on the path to data driven insights. These include Catalogue & Search Functionality, Data Pipelines, Data Lake from multiple sources, Schema, KPI and metrics modelling, and Transformation for visualization.
